CDE PUBLIC LECTURE

“Changing Trends in Dental Disease Prevalence in Children; Challenges in the Clinical Management”

by
Professor Monty Duggal

Synopsis of Lecture
In the talk the speaker will elucidate the following:

2. Data for prevalence of Tooth Surface Loss (TSL), is this increasing or is there increased awareness? What new innovations have come to light regarding the prevention of TSL?
3. Who gets caries? Caries is mainly distributed in about 20 percent of the population. Who are these 20%, what are their demographic and social backgrounds?
4. What challenge does this pose for our clinical management?
5. Role of sedation and general anesthesia in the management of high disease prevalence in some groups.

About the Speaker
Professor Monty Duggal, obtained his BDS from Patiala in 1983 and his MDS in Paediatric Dentistry in 1986. He then immigrated to the United Kingdom and obtained his FDSRCS from the Royal College of Surgeons of England and his PhD from Leeds University. He joined Leeds Dental Institute as a Junior Lecturer in 1989 and is currently Professor and Head of Paediatric Dentistry, Division of Child Dental Health, Leeds Dental Institute.

Professor Duggal has published over 65 research papers in international journals. He is the author of ‘Restorative Techniques in Paediatric Dentistry’. He is also a co-author of a textbook on Dental Traumatology. He is an internationally respected scientist and clinician and is invited all over the world to give talks and courses on Paediatric Dentistry. He is currently in Singapore as the 7th NUS-SDA Distinguished Speaker.
