Our Mission for Sleep Medicine Awareness
The NUS Edmund Tay Mai Hiong Endowed Fund was started to not only raise public and medical community awareness of dentistry’s role in sleep and airway issues but to empower and recruit dentists as front line professionals in the early detection of sleep-disordered breathing (SDB). We strongly believe that the informed dentist, working together with a team of dedicated sleep experts, has the potential to be a major factor in the co-management of many sleep-related disorders, not only Obstructive Sleep Apnea (OSA). For more information visit www.etmh.com.sg.
