

BLOOMS: A FACULTY OF DENTISTRY DISCOVERY SERIES

Join us on a journey that BLOOMS innovative ideas and collaborations

BLOOMS, a three-day research discovery series presented by the NUS Faculty of Dentistry and Oral Care Health Innovations and Designs Singapore (ORCHIDS), seeks to bring together postgraduate students and early career researchers to discuss trends and technologies in the fast-evolving biomedical and craniofacial research industries.

The series will take participants through the fundamentals, development and clinical translation of progressive research fields such as emerging digital technology in research, biofabrication and microfluidics.

Participants will get to experience the vibrancy of living on campus, interacting with researchers and learning through hands-on activities in state-of-the-art facilities and laboratories.

Fees

Tertiary/PhD Students
SGD300*

Researchers/Clinicians/Academics
SGD1,000*

*Fees are exclusive of prevailing Goods and Services Tax (GST).

Fees include meals and accommodations on NUS campus throughout the programme but exclude visa application fees, air fares and other living expenses.

Supported By:

Centre for
Additive Manufacturing

19 to 21 July 2023
(Wednesday to Friday)

**National University of
Singapore**
