### Crown Lengthening Surgery - King's College London

<b>Crown-Lengthening Surgery</b> <i>Webinars facilitated by Prof Luigi Nibali and Dr Emily Lu (King's College London)</i>	<b>Facilitators from King's College London</b>
<p><b>Can we save the 'unsavable' teeth? What is the limit of periodontal treatment in 2020?</b></p> <p>This webinar discussed how the latest advances in periodontal treatment have pushed the boundaries of what teeth affected by periodontitis can be retained. The session reviewed the definition of 'hopeless' tooth and described both non-surgical and surgical treatment options.</p>	<p><b>Dr. Emily Lu</b></p>  <p>Clinical Lecturer and Honorary Consultant in Periodontology at the Faculty of Dentistry, Oral and Craniofacial Sciences, King's College London</p>
<p><b>Novel biologic concepts underpinning periodontitis and response to periodontal surgery</b></p> <p>This presentation highlighted the key biologic regulators of the junctional epithelium in health, disease and following periodontal and implant surgery. Drawing on the latest research, clinical implications of this knowledge were discussed.</p>	<p><b>Prof. Luigi Nibali</b></p>  <p>Professor/Honorary Consultant, Academic Lead and Director of the Postgraduate program in Periodontology, King's College London</p>
