Digital Planning for Aesthetic and Functional Success - University of North Carolina, USA

Digital Planning for Aesthetic and Functional Success <i>Webinars facilitated by Drs Ingeborg De Kok, Wendy Clark, Renata Camino Navarro and Ibrahim Duqum (University of North Carolina)</i>	Facilitators from University of North Carolina at Chapel Hill
<p>Fundamentals of digital capture, planning and communication</p> <p>Speakers reviewed the basic principles that guided the digital process and how it could be applied in the clinical dental practice. Particular emphasis was given to understanding the processes and indications of 2D and 3D digital smile design and effective digital communication strategies among the dental care team.</p>	 <p>Dr. Wendy AuClair Clark Director of Pre-doctoral Removable Prosthodontics, UNC Adams School of Dentistry</p>
<p>Clinical applications of digital dentistry in prosthetic, implant and cosmetic dentistry (patient-based presentations)</p> <p>Speakers highlighted in, patient-based presentation format, how to employ function and aesthetic determinants in digital case planning. Furthermore, additive manufacturing (3D printing) and its incorporation in aesthetic diagnosis and planning were discussed, among other frequently utilised digital tools to better patient outcomes in prosthetic, cosmetic and implant dentistry.</p>	 <p>Dr. Renata Camino Navarro Assistant Professor, Department of Prosthodontics, UNC Adams School of Dentistry</p>
	 <p>Dr. Ingeborg K. De Kok Associate Professor of Prosthodontics, Division of Comprehensive Oral Health, UNC Adams School of Dentistry, and Director for Global Initiatives and Chief Global Officer</p>
	 <p>Dr. Ibrahim Duqum Associate Professor of Prosthodontics and Director of Pre-doctoral Prosthodontics, Division of Comprehensive Oral Health, UNC Adams School of Dentistry</p>
