

Beyond the gums: Multidisciplinary approach to managing complex patients

TUESDAY, 29 SEPTEMBER 2026

6:30PM - 8:30PM

LEVEL 9, AUDITORIUM, NUCOHS

REGISTRATION FEE (INCL. 9% GST): S\$30.00*

**TARGET AUDIENCE: DENTAL GRADUATES
(CLASS OF 2021 - 2026)**

Dental plaque has long been established as the primary etiological factor in periodontal disease. However, in medically and prosthetically complex patients, periodontal diagnosis, treatment planning and management can become significantly more challenging. Through real-life cases, this talk explores how systemic conditions and medications can complicate even routine periodontal care. Practical clinical tips, common pitfalls and decision-making strategies relevant to general dental practitioners will be discussed.

LEARNING OBJECTIVES

- Recap on the etiology and risk factors for periodontal diseases
- Gain insights into treatment planning for medically and prosthetically complex periodontal patient
- Updates on the latest guidelines for managing the complex periodontal patient
